

OUTFITTERS

DISTILLED
USA
& BOTTLED

Made for Bartenders.
Designed for cocktails.
Made from American
heartland corn using
multiple column
distillation and gently
blended with cascade
mountain water for a
crisp and clean vodka.

INGREDIENTS

MIDWEST CORN

Grown in the USA and high in the
sugars, the key ingredient in the
process of making alcohol, making
corn the ideal crop to produce a
efficient and clean vodka.

DISTILLATION

COLUMN DISTILLED 5 TIMES

Outfitters vodka is distilled over
192.4 proof, much higher than the US
standard of 190 proof. This extra little
bit allows for a cleaner, smoother,
and crisper vodka. Excellence in
processing matters!

WATER

CASCADE MOUNTAIN WATER

Our spirits are distilled at over 192.4
proof to produce a clean and crisp
base which then gets diluted to 40%
alc. by vol. using water from aquifers
near the foot of Mt. Baker, known for
the longest snow pack in the lower
48 states. This water rounds out the
spirits, lending a smooth and
refreshing profile to Outfitters Vodka.

12 BOTTLES PER CASE

POLISHING

COCONUT CARBON

Commonly referred to as the best,
activated coconut carbon is used to
polish and brighten the vodka just
before bottling, aiding in a silky and
smooth mouth-feel.
